*Mid Year Note: Only 73% of Reading and 68% of Math assessments given resulted in valid scores as determined by the NWEA system. This is the result of scores below the test's valid range, a standard error above the test's acceptable limits, or a student's inability to complete testing.

* End of Year Note: 82% of Reading and 83% of Math assessments resulted in valid scores as determined by the NWEA system. This is the result of scores below the test's valid range, a standard error above the test's acceptable limits, or a student's inability to complete testing.

** Due to age ranges of students in race/ethnicity categories the reported RIT scores are expected to be lower than the K-12 average.
